In this comprehensive guide, we will take you through every step of the portrait-making process, from sketching and drawing to painting and finishing. We will cover everything you need to know to create stunning acrylic portraits that will impress your friends and family.

### Step 1: Sketching the Portrait

The first step in painting a portrait is to create a sketch. This will help you to get the proportions and composition of the face correct. To sketch the portrait, you will need a pencil and a piece of paper.

1. Start by drawing a circle or oval for the head. This will be the basic shape of the face.
2. Next, draw a line down the center of the circle or oval to divide the face in half.
3. Then, draw two horizontal lines across the face to mark the location of the eyes, nose, and mouth.
4. Continue to add details to the sketch, such as the eyebrows, eyelashes, lips, and teeth.
5. Once you are happy with the sketch, you can start to draw the outlines of the face and hair.
